

Inspire Fitness 50lb (23kg) Weight Stack Add-On

£99.00

Product Images

Short Description

Rather than trying a DIY solution to increase resistance, this 50lb (23kg) weight stack add-on kit comes with 5 plates which are 10lb each. Compatible with the M1 multigym or FT1 and FT2 functional trainers, this will add extra weight to the stack to help you build strength. Just remember you will need to order 2 if purchasing for the FT1 or FT2.

Description

50lb Weight Stack Upgrade Plates

As you get stronger you may find that you need to increase your weight beyond what your FT1 or FT2 provides. They are a few quick hacks you can employ for this, but why not do it properly and safely with this weight stack plate upgrade kit.

Supplied as 5 x 10lb weight plates, this means an overall increase of 50lbs or 23kg to your Inspire Fitness multigym or functional trainer. The plates will fit a number of models including the M1, SCS, FT1* & FT2*. The FT range will require you to buy 2 sets so you can add the additional 50lbs to each stack.

They are quick and simple to add - so no need for technical expertise.
