

Sole CC81 Cardio Climber

£1,899.00

Product Images

Short Description

If you like your cardio workouts to be high intensity, but you're not keen on any kind of impact then this CC81 Cardio Climber from Sole could be your ideal gym partner. Combining both a stepper and a climber, you can choose to work legs only or your legs and arms at the same time. Easy to use and easy to manage.

A Combined Stepper & Climber

Two exercises that really build your cardio. The CC81 Cardio Climber gives you the total body workout and also features adjustable handlebars, real time metrics so you can see your workout goals and thanks to its patented eddy current braking, you get all the resistance you can handle. Also has convenient water bottle holders, a tablet holder and can take users up to 180kg.

We Give You More...

Description

A Combined Stepper & Climber

Designed for high intensity training, you can use for toning, cardio and stamina workouts for your legs and arms. Low impact also means a wider range of people can use safely.

Key Features

- Thick steel frame gives superb stability and rigidity. Which means no wobbling about mid exercise.
- The foot pedals are of a custom design and have a 2 degree slope inwards that reduces ankle and knee stress
- Fully adjustable handles are easy and simple to use
- You can also increase or decrease the resistance with an easy to use knob
- Use your smart device whilst training thanks to the integrated tablet holder
